Summary

I am a Frontend Engineer with a degree in Information Technology. I am passionate about frontend development and currently seeking opportunities to grow further in this field.

Skills

Languages: HTML | CSS | JavaScript

Frameworks: React | Bootstrap | Tailwind

Design Tools: Figma | Adobe Creative Suite

Others: Git

Experience

POQA Company Ltd | Junior Frontend Engineer | 08/2023 - Present

- I collaborated as part of the frontend development team to build a freight forwarding web application using React.
- We designed the user interface for the Ghana District Directors Health Service website and developed it using WordPress with the Avada theme.

Volunteer Experience

Calme Mental Health | Web Development Team

- Contributing as a frontend developer to an ongoing team project using React.
- Designed the UI/UX for the official Calme Mental Health website and collaborated on the overall website architecture.

GAC – BETHEL CENTER | IT Team

- Designing a modern, mobile-first interface for the church's new website and am currently implementing it with React and Firebase.
- Produce weekly digital assets: flyers, motion graphics, and short-form video reels for services and events, steadily increasing online engagement.

Education

BSc in Information Technology, Graduation: 08/2023

University Of Cape Coast, Cape Coast

GPA: 3.6 / 4.00
